

## Reading Exercise 2: Identifying Technical Vocabulary

### Spring 2019

In your pre-read for the next assigned reading, identify some technical vocabulary the author is using. Pick four words from the reading. Note: they can be perfectly common words, but that take on a special or important meaning for the author's argument. Based on your careful (stage 2) reading of the text, explain what the terms mean in your own words, and indicate a page number for where you found this explanation.
